7 · Questions & troubleshooting

i The screenshots in this manual use made-up sample horses and people. Your portal shows your own farm's information.

CHAPTER 1

Getting started

Signing in, finding your way, and keeping your account safe.

What the portal is

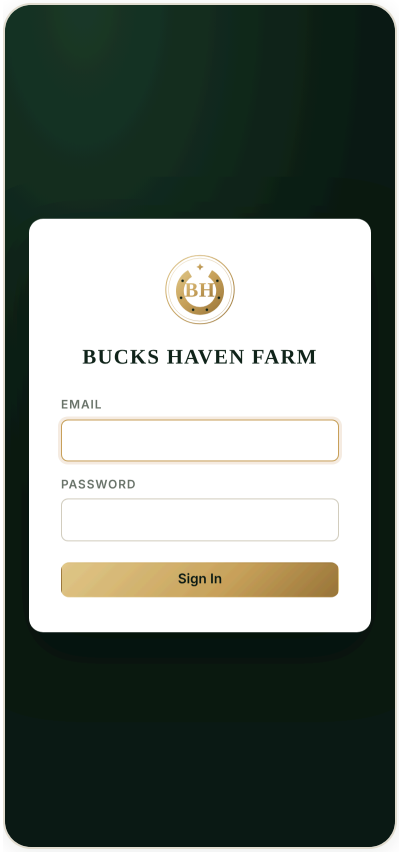

The portal is the farm's private website for running the barn day to day. Staff use it to clock in, check off feedings and work through tasks. Boarders use it to see their horses' records and farm news. The office uses it to manage horses, boarders, staff schedules and announcements. It works on phones, tablets and computers. There's nothing to install: you use it in a web browser.

Who can do what

Role	Who it's for	What they can use
Admin	The farm office	Everything: horses, boarders, tasks, schedules, feeding charts, time-off approvals, the clock log, announcements, private notes and user accounts. Admins can also open the staff pages.
Employee	Barn staff	Their home page, the time clock, today's feeding checklist, their tasks and tasks for everyone, their schedule, availability, time-off requests and staff news.
Boarder	Horse owners	Their own horses' records, care team, feed program and documents, their contact details and emergency contacts, and farm news.

Boarders only ever see their own horses. Office notes, the clock log and other people's details are never visible to boarders or staff.

Signing in

The sign-in page

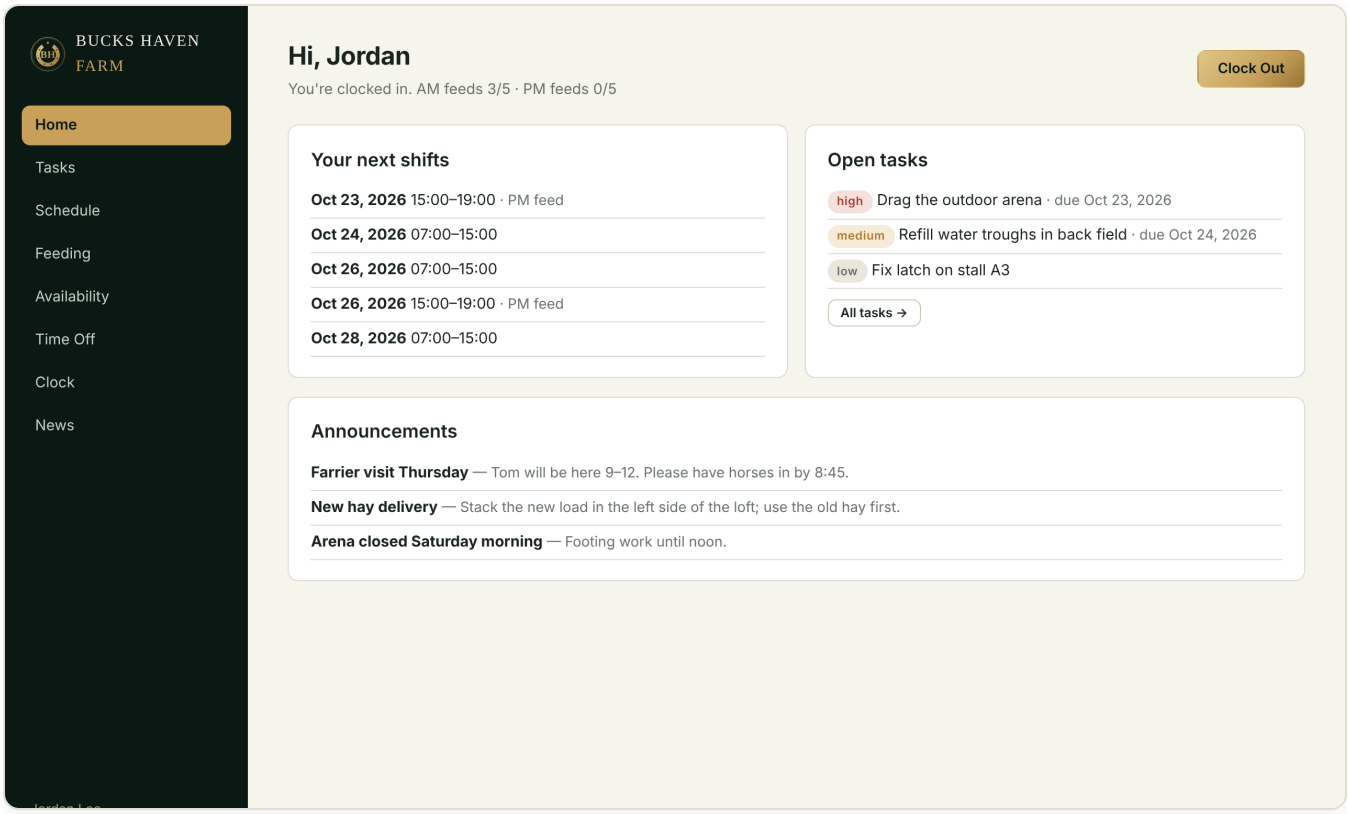

1. Go to **buckshavenfarm.com** and tap **Portal** in the top menu, or go straight to **buckshavenfarm.com/portal**.
2. Enter the **email address** the office registered for you, and your **password**.
3. Tap **Sign In**. The portal opens the right home page for your role.

If you see *"Wrong email or password — try again."*, check the spelling of your email and that Caps Lock is off. The same message appears if the office has disabled your account.

> ✓ You stay signed in on that device for up to 30 days. Add the portal to your phone's home screen (in your browser's **Share** or ⋮ menu → **Add to Home Screen**) and it opens like an app.

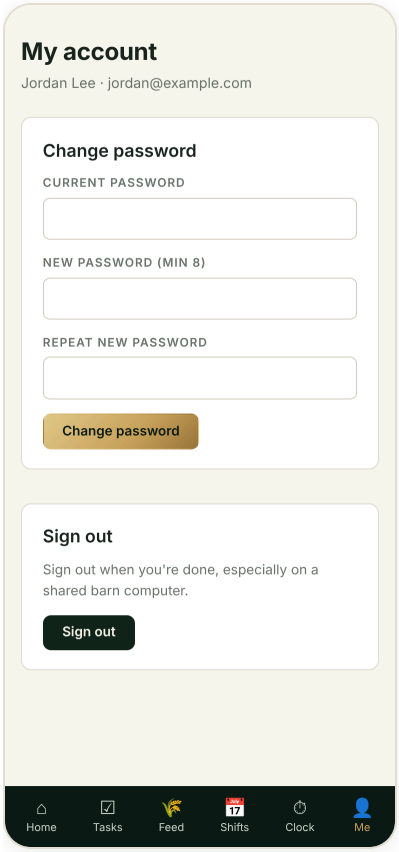

Finding your way around

On a **computer**, the menu runs down the left side. Your name, **My account** and **Sign out** are at the bottom of that menu. On a **phone**, the menu becomes a bar of buttons along the bottom of the screen.

The staff home page on a computer, with the menu on the left

Changing your password

My account on a phone

Everyone should change the temporary password the office gives them the first time they sign in.

1. Open **My account**. Staff and admins: at the bottom of the left menu, or 👤 **Me** on the phone bar. Boarders: **My Account** (👤 **Account** on phones).
2. Type your **current password**.
3. Type your **new password** twice. It must be at least 8 characters and different from your current one.
4. Tap **Change password**. A green *"Your password has been changed."* confirms it.

> *i* After 5 wrong attempts at your current password, changing it is paused for 15 minutes. This stops someone at a computer you left signed in from guessing it.

Forgotten passwords

There is no "forgot password" email. Ask the office: an admin can set a new temporary password for you in a few seconds (see *Users & passwords* in Chapter 4). Then sign in with it and change it straight away.

Signing out

Use **Sign out** at the bottom of the left menu, or on the **My account** page on a phone. Always sign out on shared computers, such as the one in the barn office.

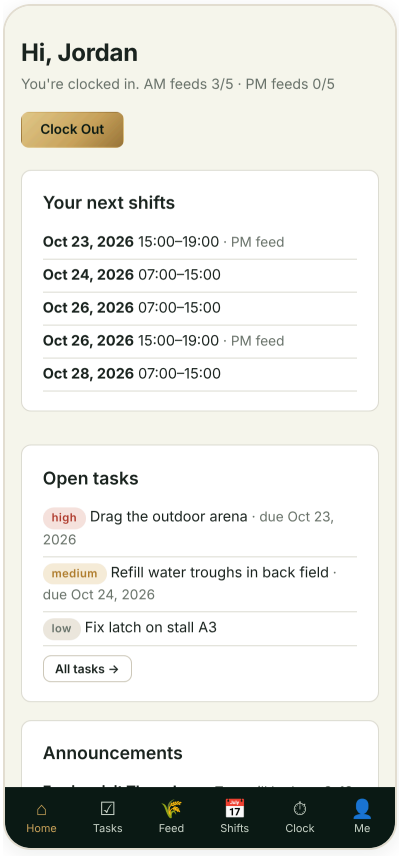

CHAPTER 2

Barn staff guide

Everything you need on a shift, made for your phone.

The phone bar at the bottom has **Home**, **Tasks**, **Feed**, **Shifts**, **Clock** and **Me**. Availability, Time Off and News are in the left menu on a computer or tablet.

Your home page

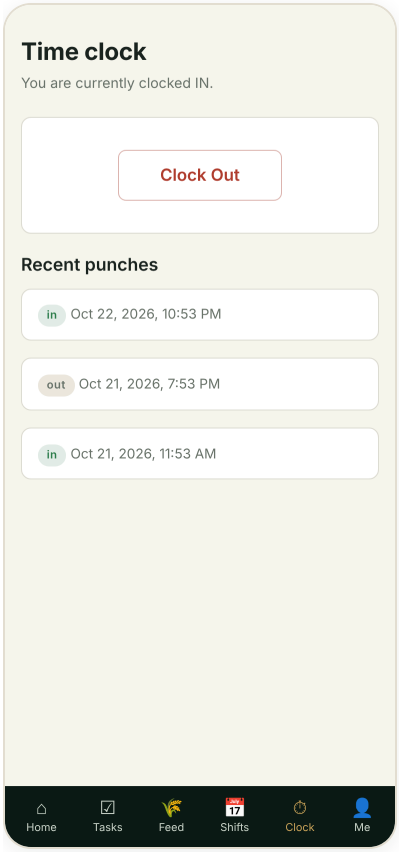

Staff home page

Your home page shows, at a glance:

- whether you're **clocked in or out**, with a button to switch;
- how many horses have had their **AM and PM feeds** today (for example *AM feeds 3/5*);
- your **next shifts**;
- your **open tasks**, including tasks for anyone, with the most urgent first;
- the latest **announcements**.

Clocking in and out

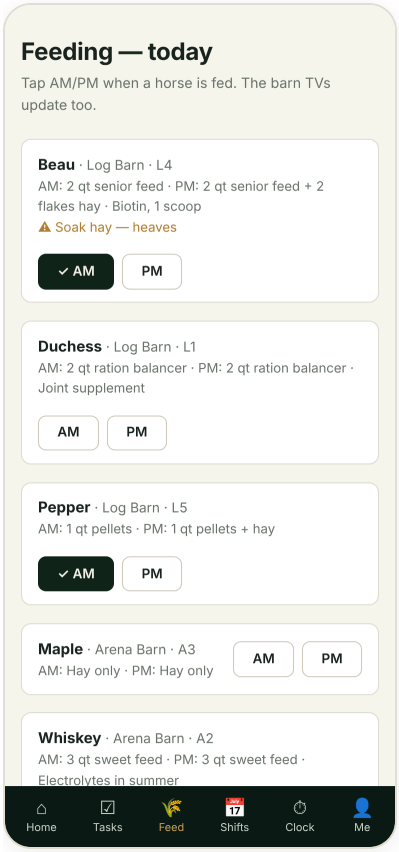

The time clock

1. Tap **Clock** on the phone bar, or the **Clock In** button on your home page.
2. The page says whether you're currently clocked **IN** or **OUT**. Tap the big button to switch: gold **Clock In**, or red **Clock Out**.

Your last 20 punches are listed underneath with the date and time. The office sees everyone's punches in the **Clock log**.

> ✓ Tap once and wait for the page to update: every tap records a punch.

The feeding checklist

Today's feeding checklist

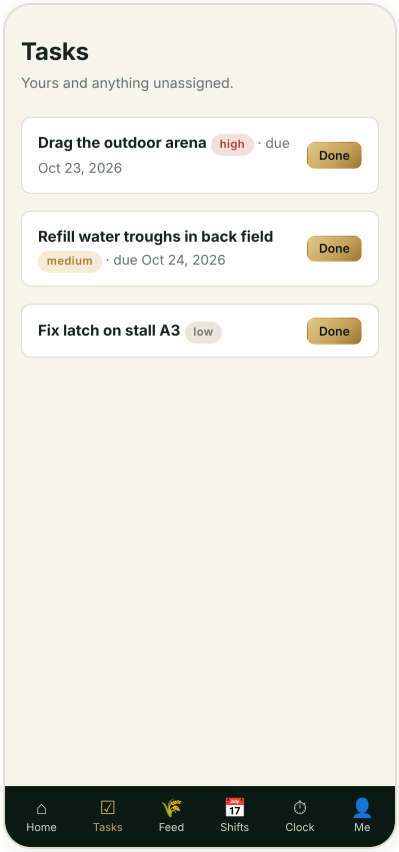

Feed lists every active horse, grouped by barn, with:

- barn and stall;
- the **AM** and **PM** feed and any **supplements**;
- special instructions marked ⚠, such as *"Soak hay — heaves"*. Read these every time.

When you've fed a horse, tap its **AM** or **PM** button. It turns dark with a tick (✓ **AM**). Tapped by mistake? Tap it again to undo.

The barn TVs and the office dashboard pick up your ticks automatically. The TVs refresh about once a minute.

Tasks

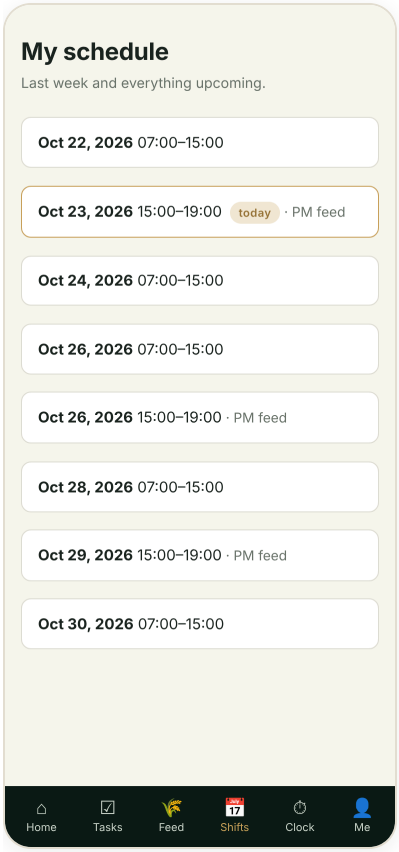

Your tasks

Tasks shows jobs assigned to you plus jobs for **anyone**. Each shows its priority (**high** **medium** **low**), due date and any notes from the office.

- Tap **Done** when you've finished a task. It moves to the bottom and fades.
- Tap **Reopen** if it needs doing again.

You can't change tasks assigned to someone else. Only the office can add or delete tasks.

Your schedule

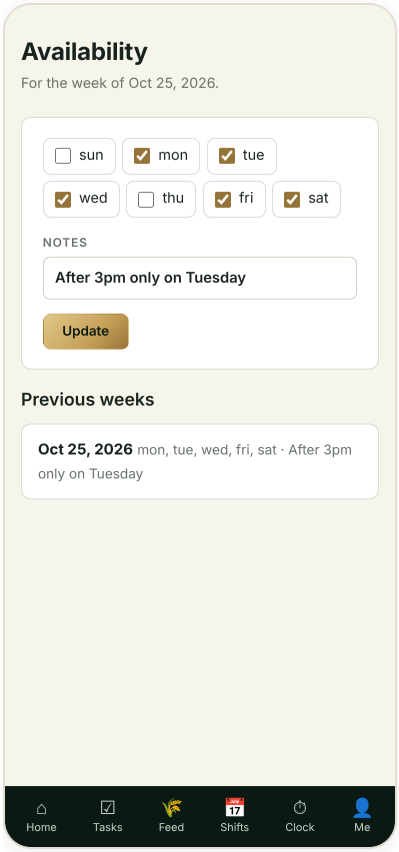

My schedule

Shifts lists your shifts from last week onwards, with start and end times and any notes, such as *"AM feed + turnout"*. Today's shift is outlined in gold and marked **today**.

The office builds the schedule. Ask them about any changes.

Submitting availability

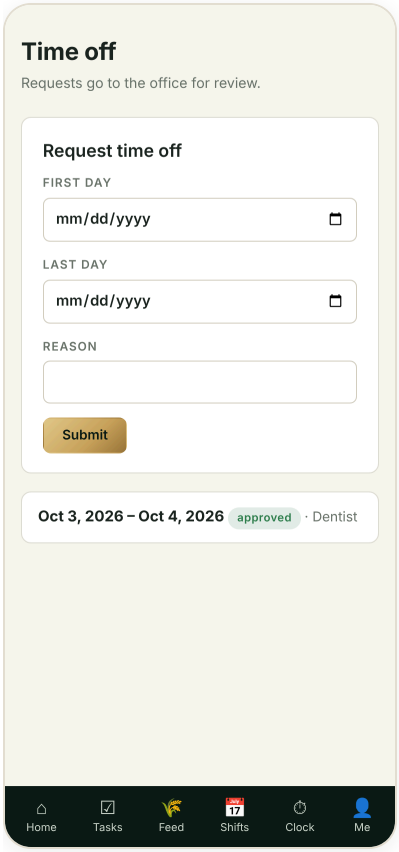

Availability for next week

Tell the office which days you can work **next week**, so they can plan the schedule. Weeks run Sunday to Saturday.

1. Open **Availability** from the left menu.
2. Tick each day you're available.
3. Add a note if needed, for example *"after 3pm only on Tuesday"*.
4. Tap **Submit**. You can come back and change it: the button then says **Update**.

Your previous weeks are listed underneath.

Requesting time off

Time-off requests

1. Open **Time Off** from the left menu.
2. Choose the **first day** and **last day** you'll be away, and add a reason if you like.
3. Tap **Submit**.

Your request shows as `pending` until the office answers. It then changes to `approved` or `denied`.

News

News (Announcements) shows everything the office has posted for staff, newest first, with who posted it and when. The three most recent items also appear on your home page.

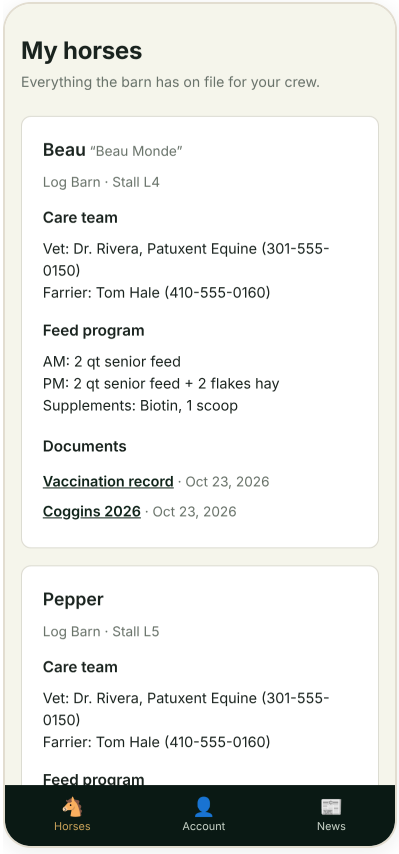

CHAPTER 3

Boarder guide

Your horses' records, documents and farm news, any time.

Your menu has three pages: **My Horses**, **My Account** and **Farm News**. On a phone they're 🐴 **Horses**, 👤 **Account** and 📰 **News** along the bottom.

My horses

My horses on a phone

For each horse linked to your account, you'll see:

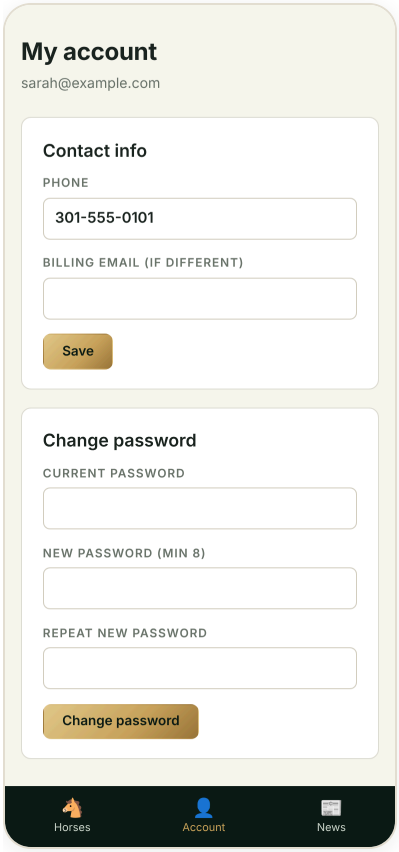

- its barn name and show name, barn and stall;
- the **care team**: vet and farrier, with phone numbers;
- its **feed program**: AM and PM feed and supplements;
- its **documents**.

Don't see a horse? The office links horses to owners. Ask them to connect it.

Documents

Coggins, vaccination records, registration papers and insurance documents that the office uploads appear under **Documents**. Tap a document's name to open or download it. Only you and farm staff can open your horses' documents; other boarders can't.

My account & emergency contacts

My account

- **Contact info:** update your phone number and, if invoices should go elsewhere, a **billing email**. Tap **Save**.
- **Change password:** see Chapter 1.
- **Emergency contacts:** the people the barn calls, **in order**, if they can't reach you about your horse. Add a name, phone and relationship (spouse, trainer…) and tap **Add Contact**. Remove one with **Remove**. Contacts are called in the order you add them.

> ! Please add at least one emergency contact. In an emergency, the barn uses this list when it can't reach you.

Farm news

Farm News shows announcements the office has posted for everyone, such as farrier visits, arena closures and events, newest first.

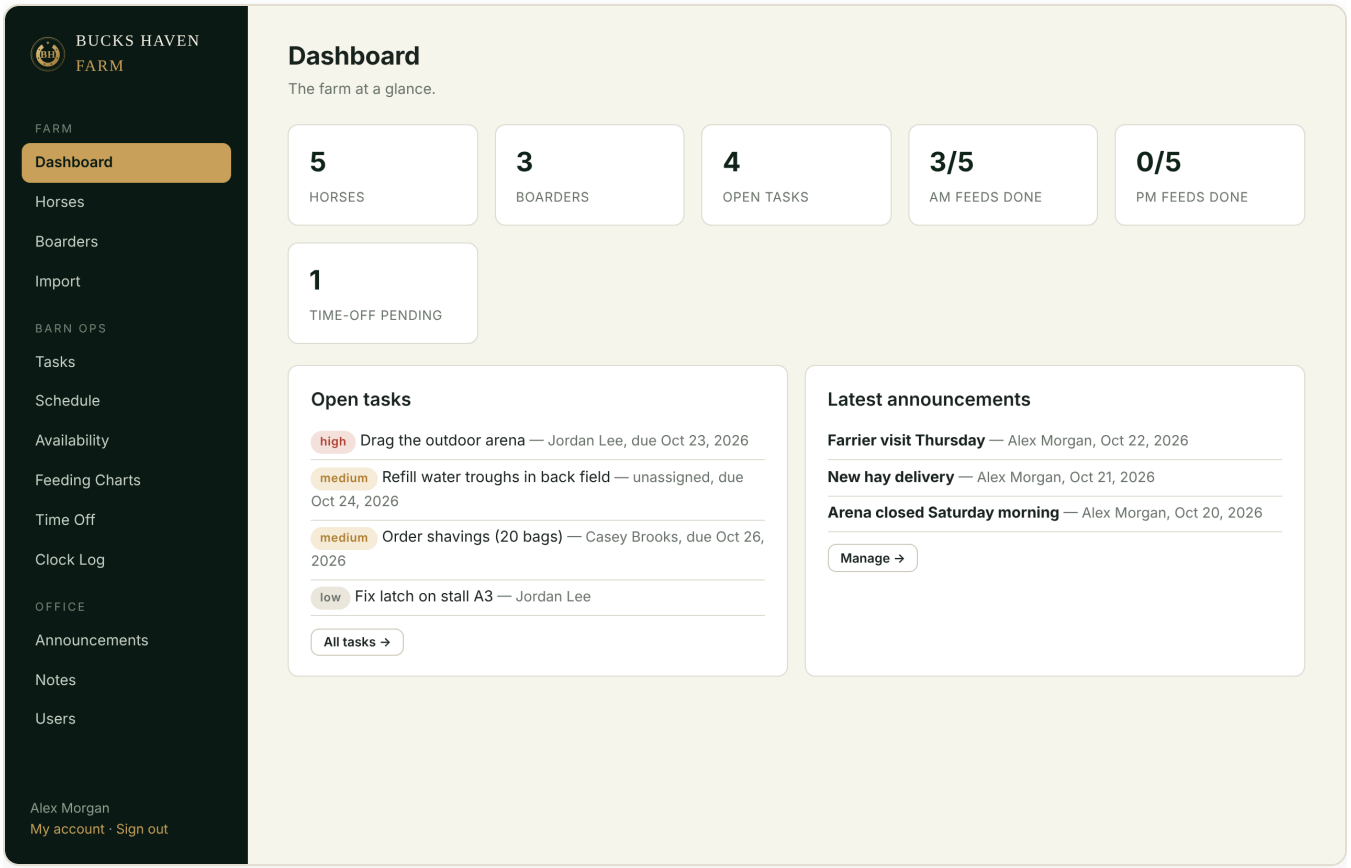

CHAPTER 4

Office (admin) guide

Running the farm: horses, people, schedules and communication.

The admin menu has three groups: **Farm** (Dashboard, Horses, Boarders, Import), **Barn Ops** (Tasks, Schedule, Availability, Feeding Charts, Time Off, Clock Log) and **Office** (Announcements, Notes, Users). On a phone, the bottom bar has Home, Horses, Tasks, Schedule, Users and Me. Use a tablet or computer for everything else.

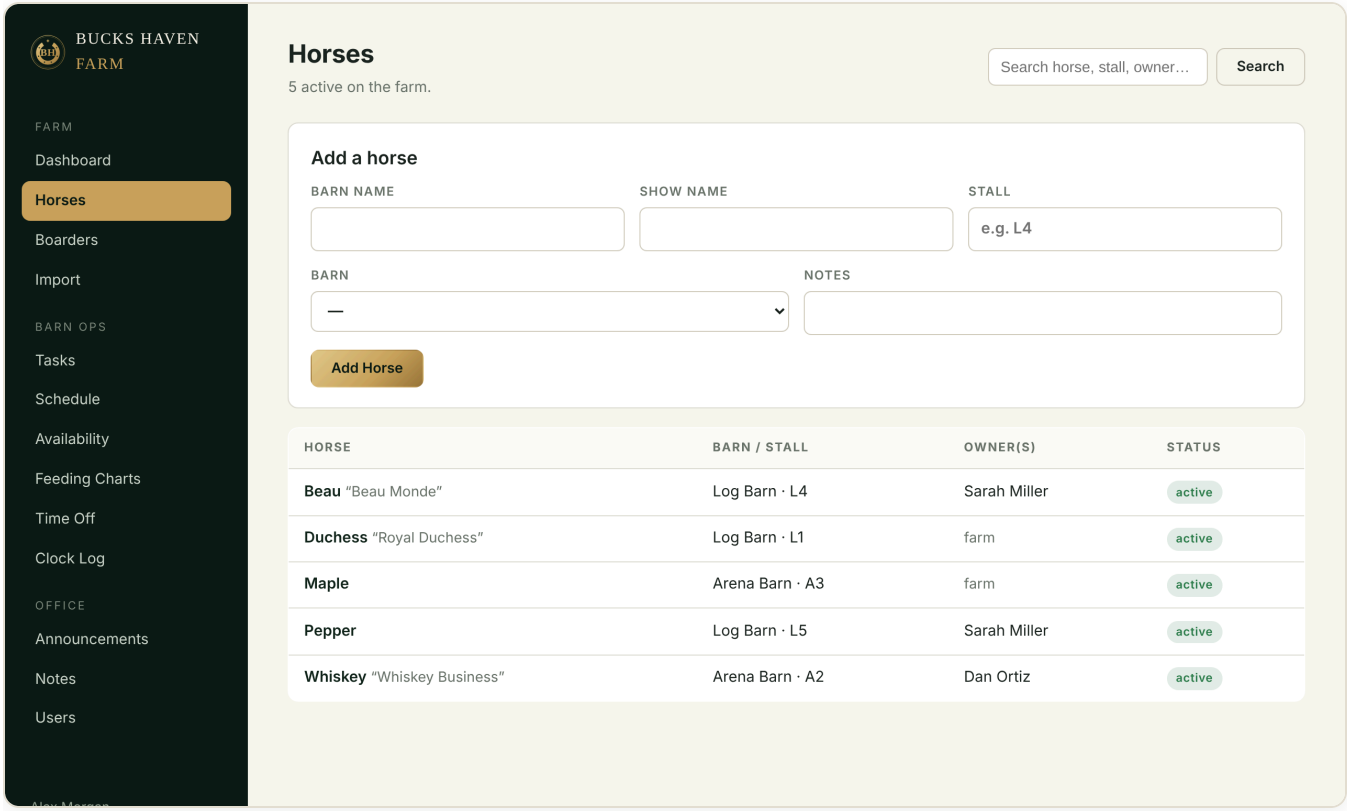

Dashboard

The admin dashboard

The dashboard shows today's numbers: active **horses**, active **boarders**, **open tasks**, **AM and PM feeds done** (out of the number of horses with a feeding chart) and **time-off requests waiting** for you. Below that are the most urgent open tasks and the latest announcements.

Horses

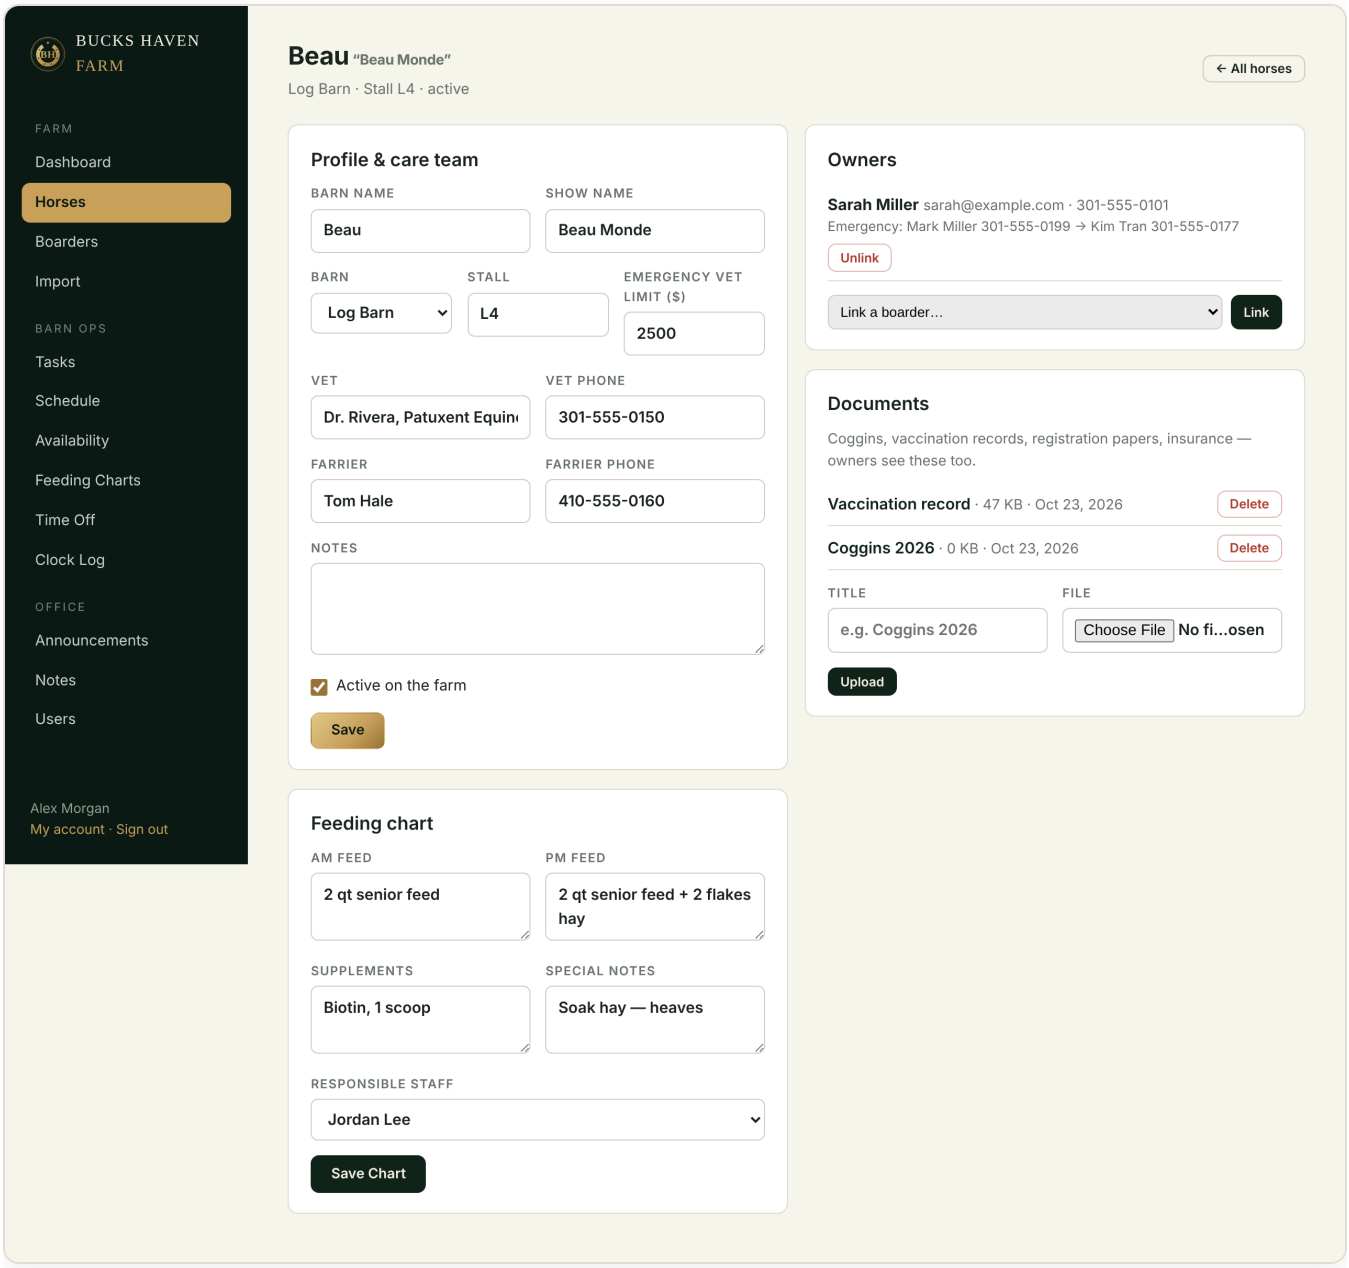

The horse list, with search and the "Add a horse" form

Adding a horse

1. Open **Horses**.
2. Under **Add a horse**, enter the **barn name** (what everyone calls the horse). Optionally add the show name, stall (for example `L4`), barn and a note.
3. Tap **Add Horse**. The new horse's page opens so you can fill in the rest.

Use the search box to find a horse by name, show name, stall or owner. Inactive horses are listed after active ones.

A horse's page

A horse's page: profile, feeding chart, owners and documents

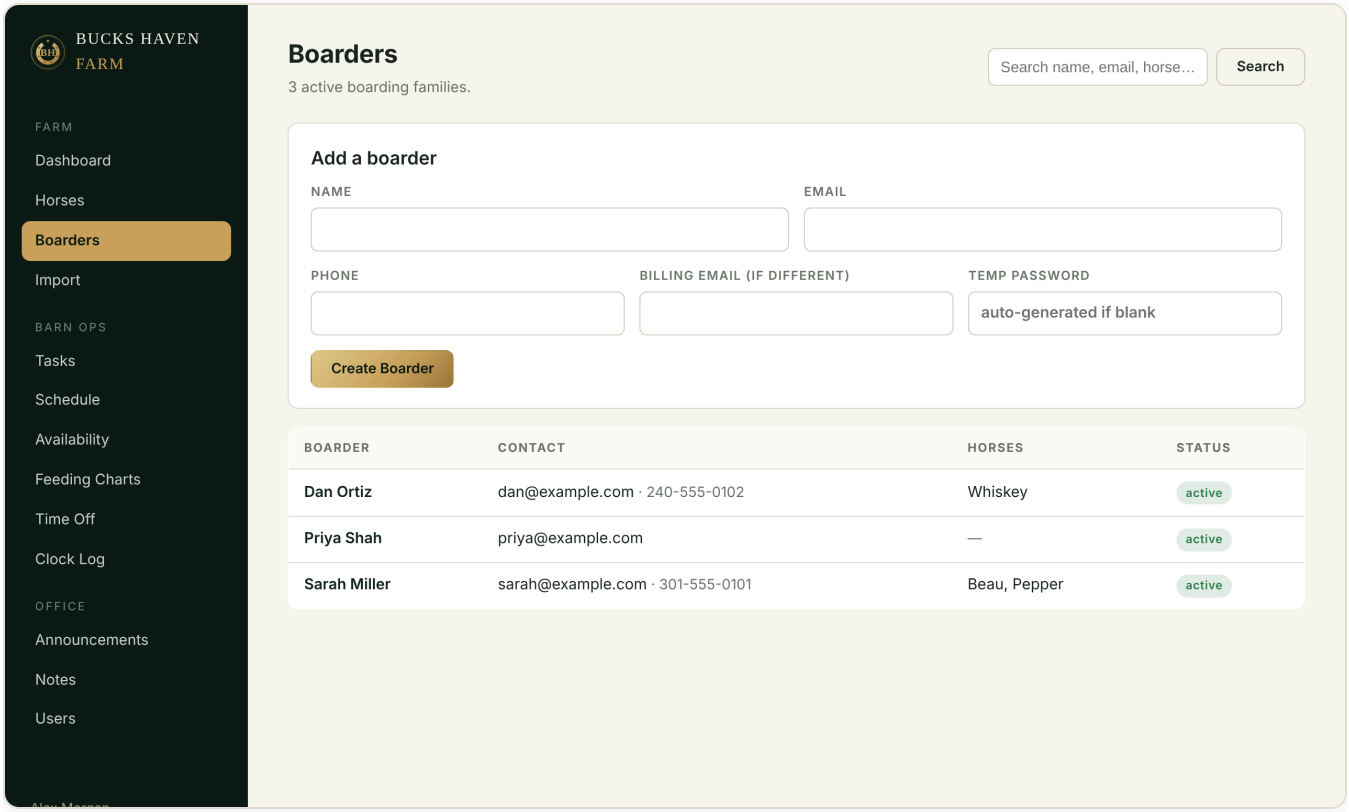

- **Profile & care team:** names, barn, stall, vet and farrier with phone numbers, an **emergency vet limit** (how much the owner has approved for emergency care), and notes. Untick **Active on the farm** when a horse leaves: it disappears from the feeding checklist and barn TVs, but its records are kept. Tap **Save**.
- **Feeding chart:** AM feed, PM feed, supplements, special notes, and the staff member responsible. Tap **Save Chart**. This is what staff see on the checklist and what the barn TVs show. **Special notes** appear with a ⚠ warning sign, so use them for anything critical.
- **Owners:** choose a boarder under **Link a boarder…** and tap **Link**. A horse can have several owners. Each owner's emergency contacts appear here for quick reference. **Unlink** removes an owner. A

horse with no owner is shown as a farm horse.

- **Documents:** give the file a title (for example *Coggins 2026*), choose the file and tap **Upload**. Owners can open these from their own portal. **Delete** removes a document.

> ✓ The barn (Log Barn or Arena Barn) decides which barn TV a horse appears on. Set it for every horse.

Boarders

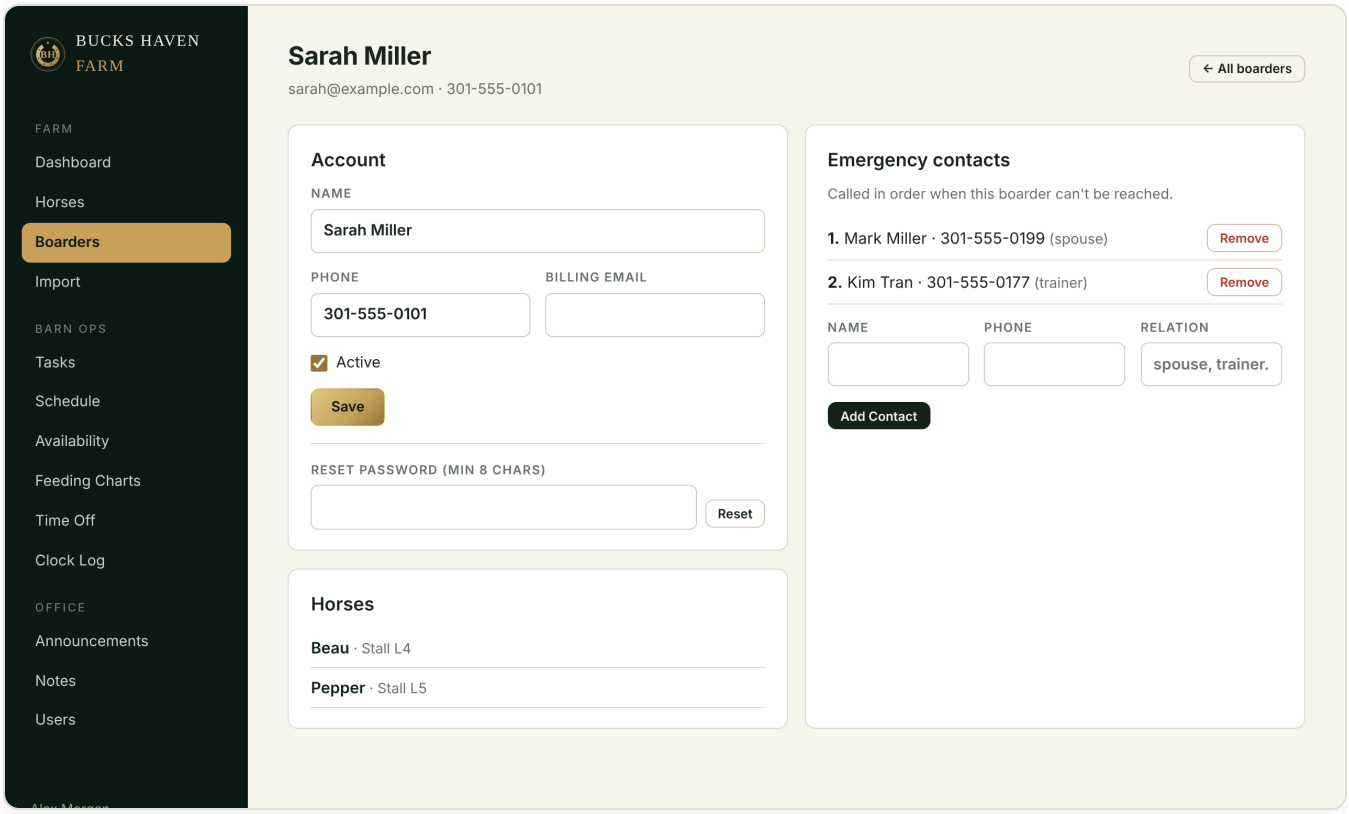

The boarder list

Adding a boarder

1. Open **Boarders**. Under **Add a boarder**, enter their name and email, plus a phone number and billing email if you have them.
2. Type a **temporary password** to give them. If you leave it blank, the portal makes a random one that nobody knows; you'd then have to set a new one on their page before they can sign in.
3. Tap **Create Boarder**. Their page opens. If that email already exists, you're taken to the existing boarder instead.
4. Link their horses from each **horse's page** (see above).

A boarder's page

A boarder's page

- **Account:** edit name, phone and billing email. Untick **Active** when someone leaves; they can no longer sign in.
- **Reset password:** type a new temporary password (8+ characters) and tap **Reset**.
- **Horses:** the horses linked to this boarder.
- **Emergency contacts:** add or remove contacts on the boarder's behalf. They're called in the order listed.

Importing boarders from a spreadsheet

To set up many boarders at once, save a spreadsheet as a **CSV file** with these column headings in the first row:

```
name,email,phone,horse_name,show_name,stall,barn,notes
Sarah Miller,sarah@example.com,301-555-0101,Beau,Beau Monde,L4,log,retired eventer
Sarah Miller,sarah@example.com,301-555-0101,Pepper,,L5,log,
Dan Ortiz,dan@example.com,240-555-0102,Whiskey,Whiskey Business,A2,arena,cribber
```

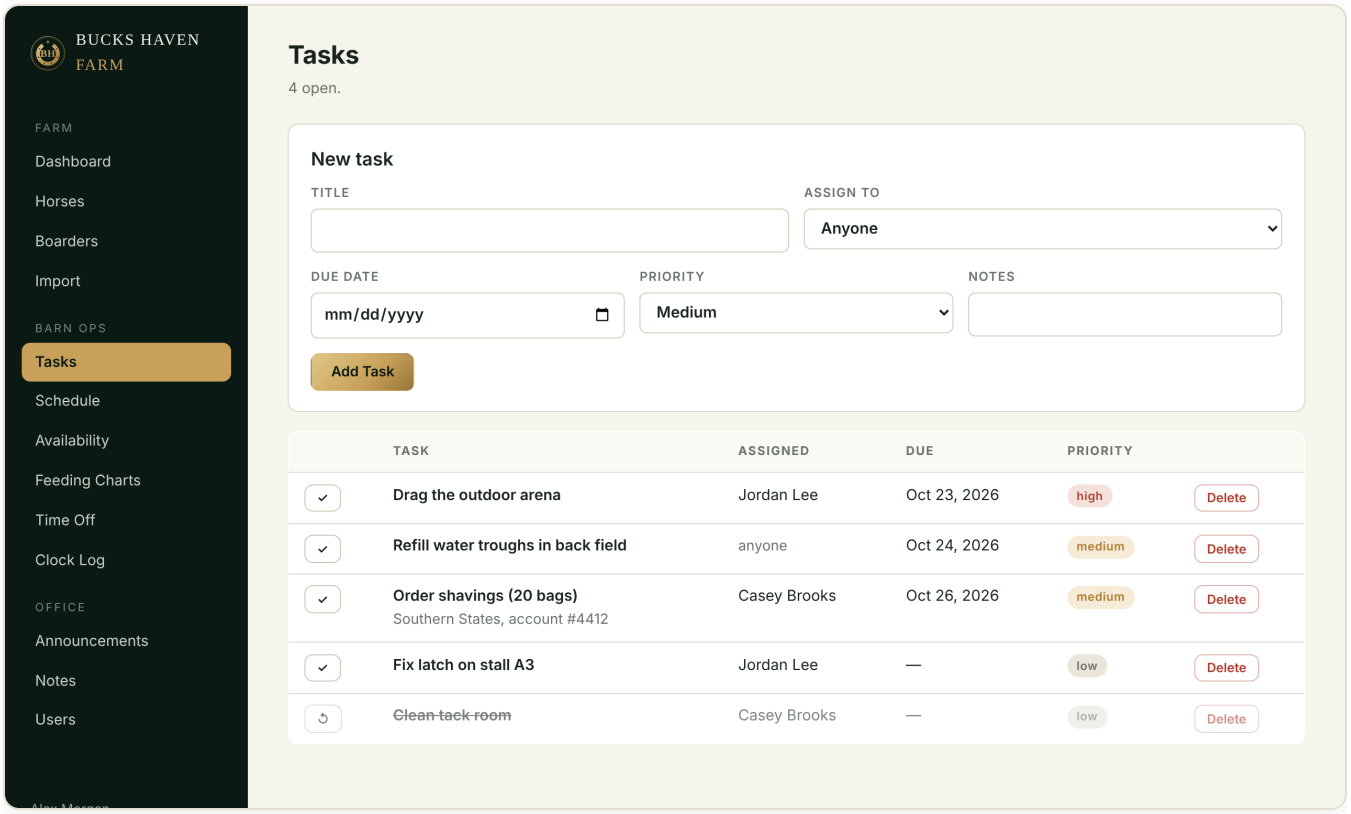

- Only `name` and `email` are required.
- Use **one row per horse**. Repeat the owner's email on each row, and all their horses attach to one account.

- `barn` accepts `log` or `arena`.

Open **Import**, choose the file and tap **Run Import**. A summary shows how many boarders and horses were created or matched. It's safe to run again: rows match by email and nothing existing is overwritten.

> *i* Imported boarders get random passwords and **no emails are sent**. Set a temporary password for each one on their boarder page, then share it with them.

Tasks

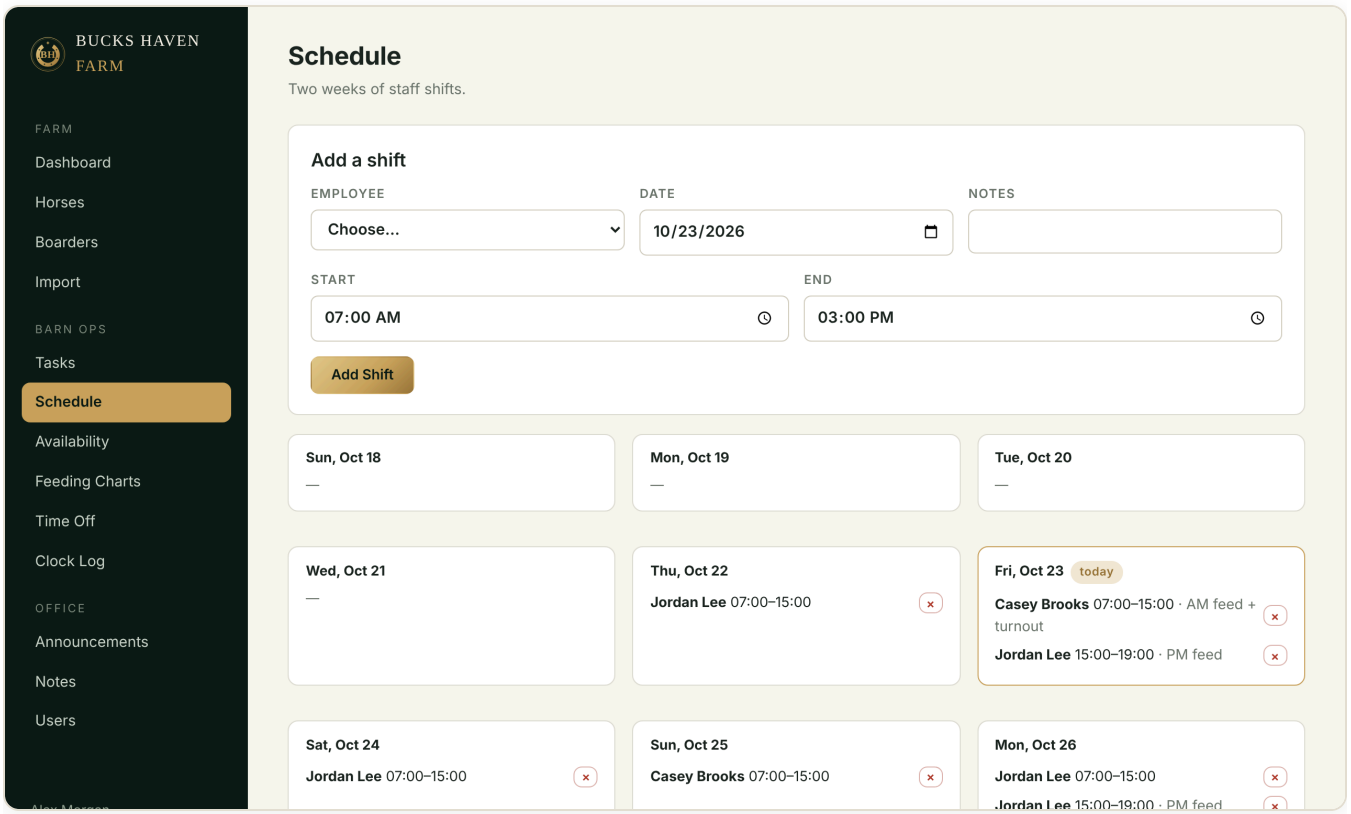

Tasks

1. Under **New task**, enter a **title**. Assign it to a staff member, or leave it as **Anyone**.
2. Optionally set a **due date**, a **priority** (low, medium or high) and notes.
3. Tap **Add Task**.

In the list, ✓ marks a task done and ↺ reopens it. **Delete** removes it for good. Open tasks are listed first, the most urgent at the top. Staff see their own tasks plus tasks for anyone.

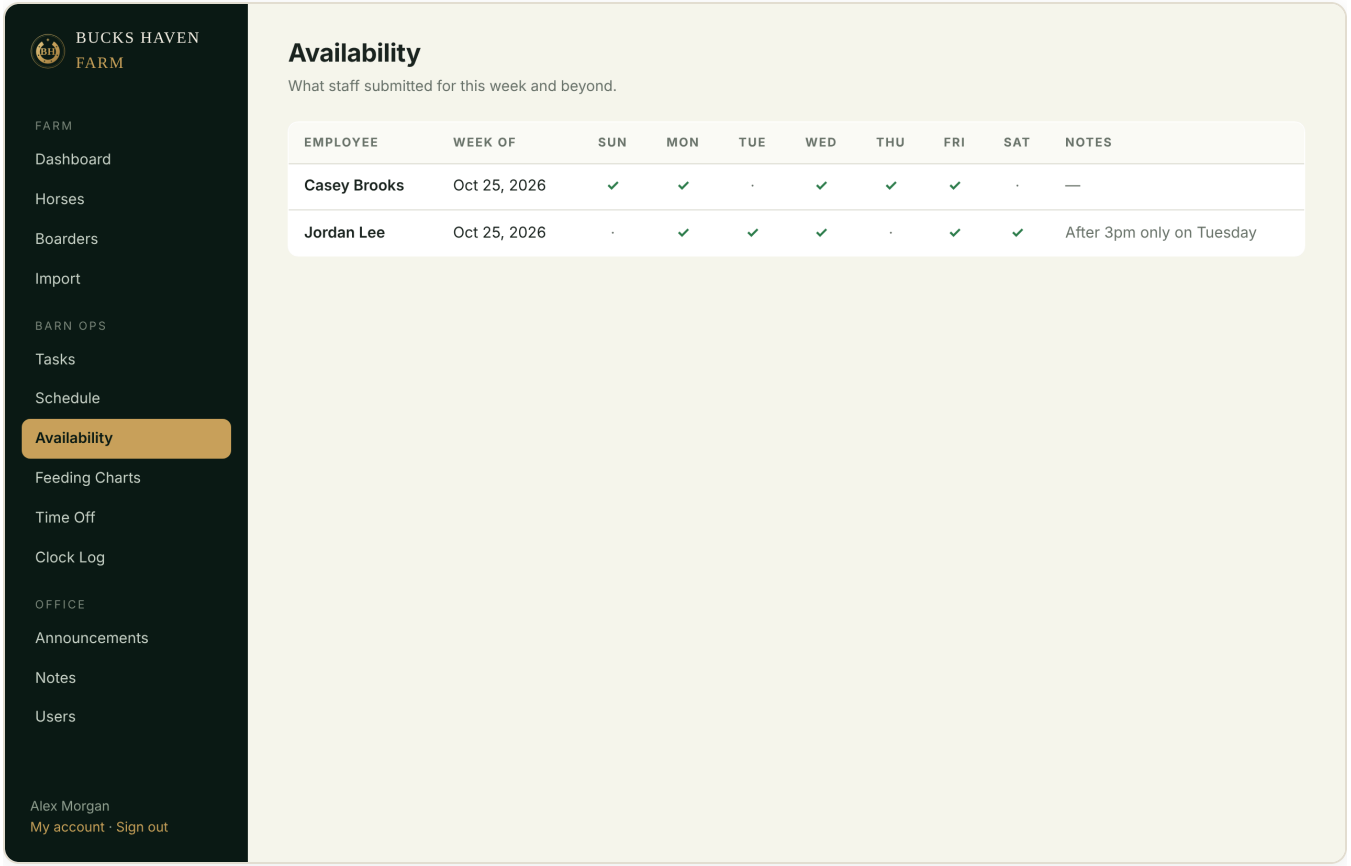

Schedule

Two weeks of shifts

Schedule shows two weeks, starting with the Sunday of the current week, with today outlined in gold. To add a shift, choose the **employee** and **date**, set **start** and **end** times (default 7:00–15:00), add an optional note, and tap **Add Shift**. Tap **×** next to a shift to delete it. Check **Availability** and **Time Off** first.

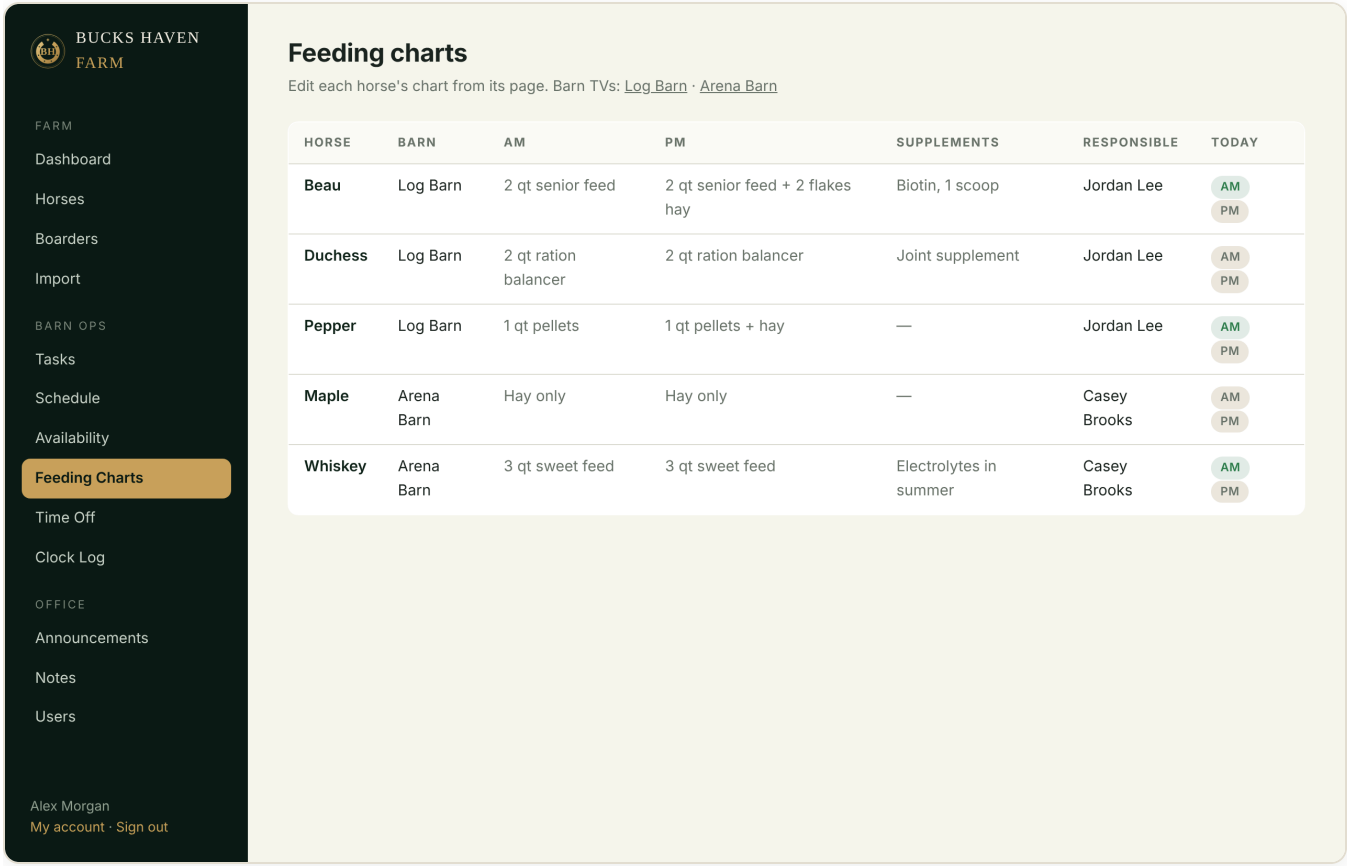

Availability

Staff availability for upcoming weeks

A table of what each staff member submitted for this week and later weeks. A ✓ means available; a dot means not available. Notes are on the right.

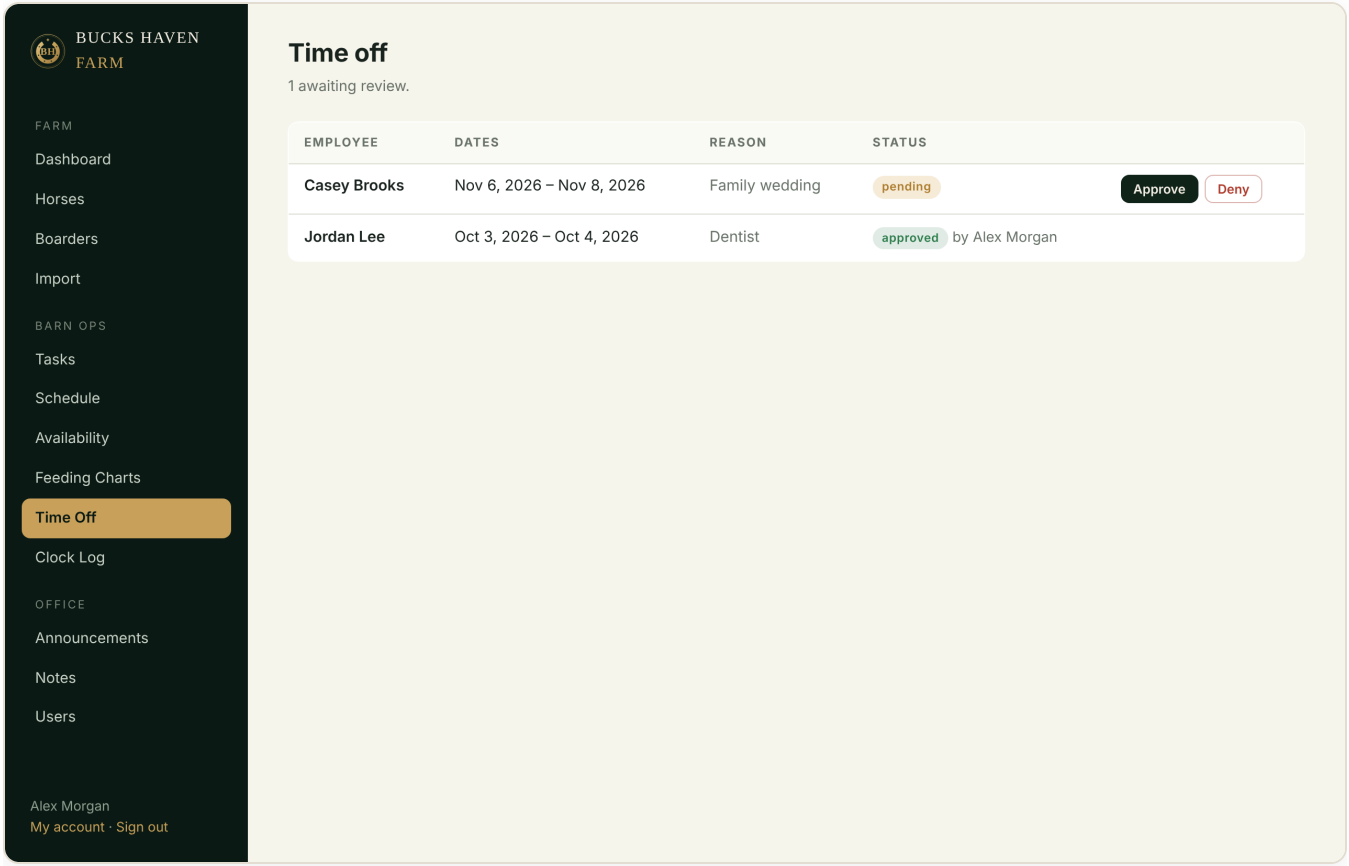

Feeding charts

All feeding charts, with today's progress

An overview of every active horse's chart, grouped by barn, with today's progress: a **AM** **PM** badge turns green once that feed is ticked off. To change a chart, click the horse's name and edit it on the horse's page. Links at the top open each barn's TV display.

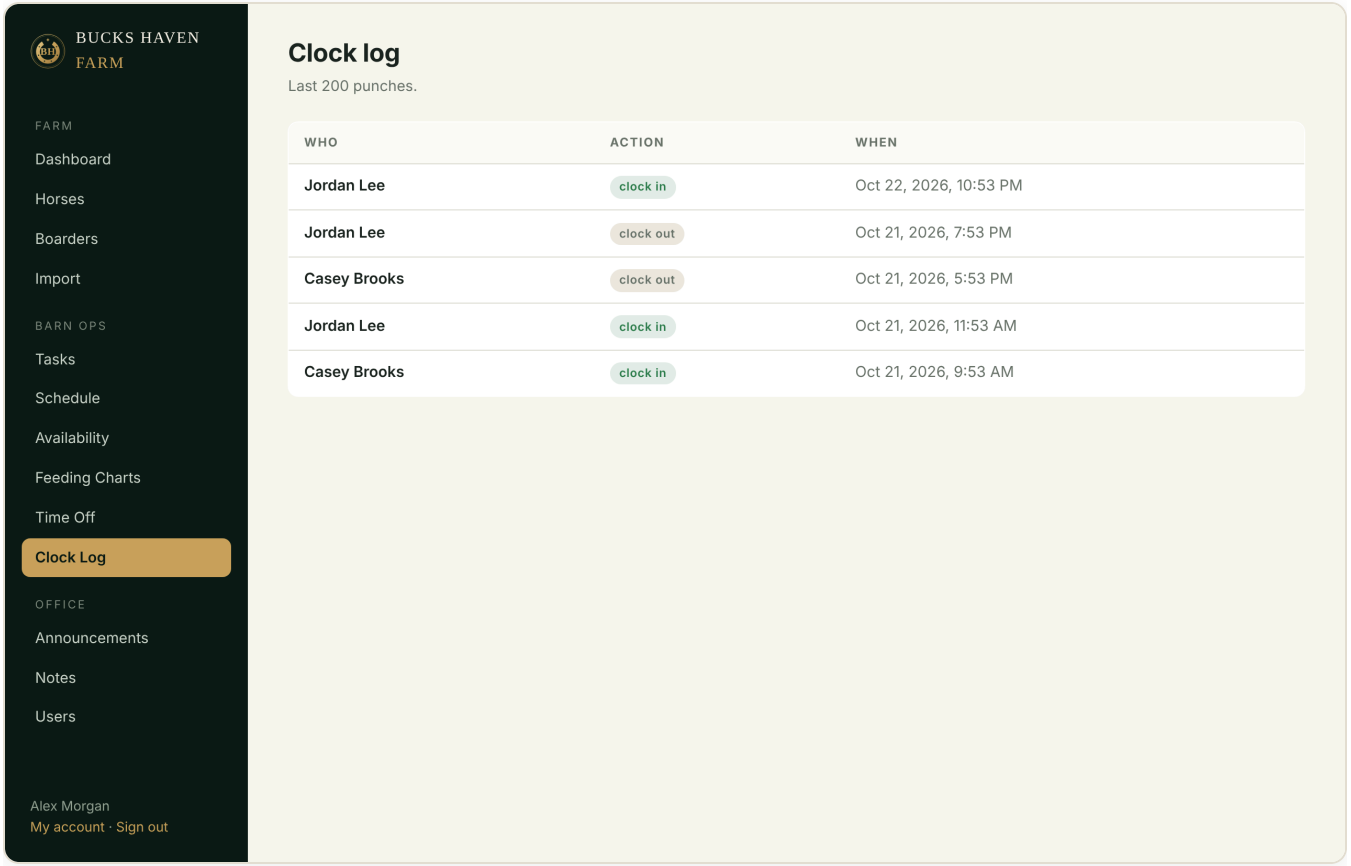

Time off

Reviewing time-off requests

Requests waiting for a decision show **Approve** and **Deny** buttons. Once you decide, the request shows who reviewed it, and the employee sees the result on their Time Off page.

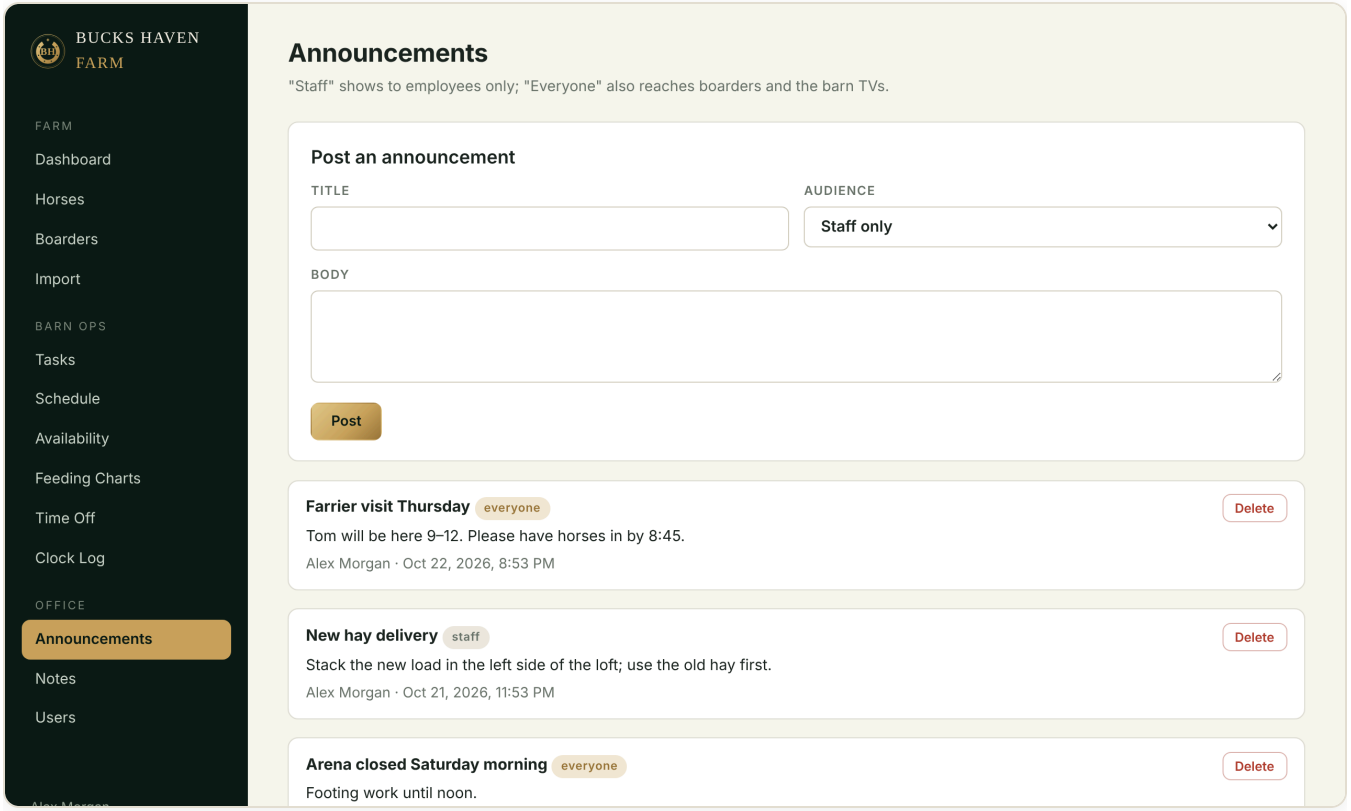

Clock log

The clock log

The last 200 clock-ins and clock-outs from all staff, newest first. Use it to check hours and payroll.

Announcements

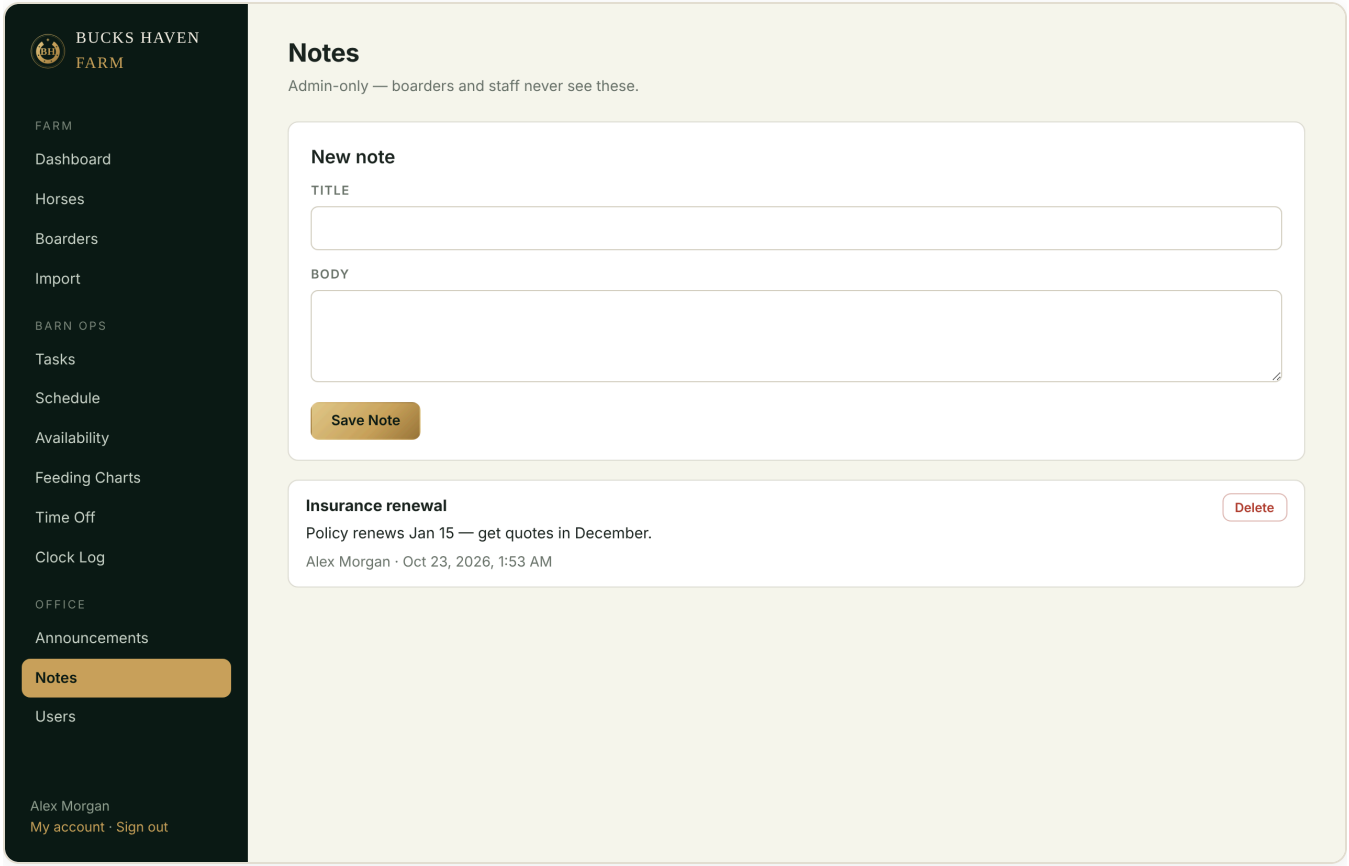

Posting an announcement

Enter a **title** and an optional **body**, pick an **audience**, and tap **Post**:

Audience	Staff pages	Boarders' Farm News	Barn TVs
Staff only	✓	—	—
Everyone	✓	✓	✓ **(latest 3)**

Delete removes an announcement from everywhere.

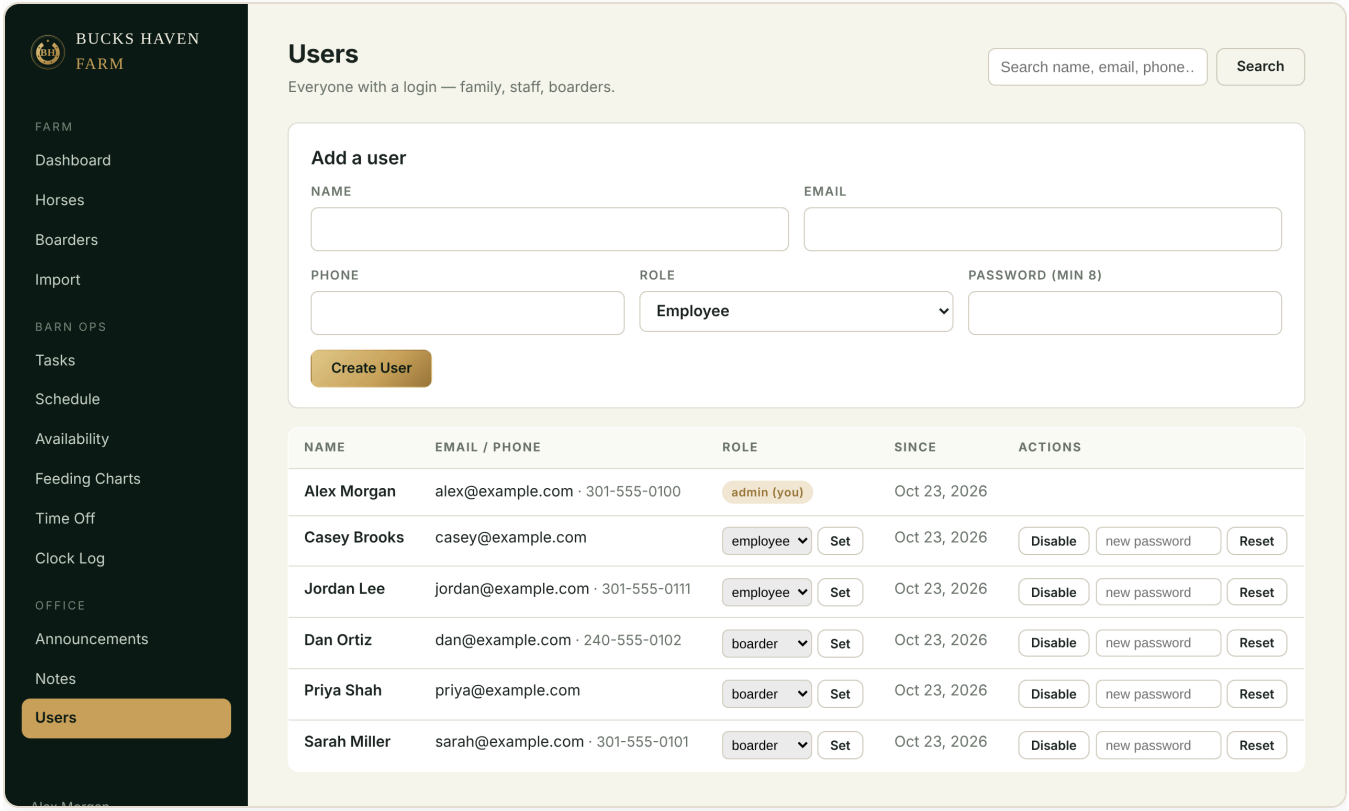

Notes

Private admin notes

A private notepad for the office: gate codes, insurance dates, supplier details. Staff and boarders never see these.

Users & passwords

All user accounts

Users lists everyone with a login: admins, staff and boarders.

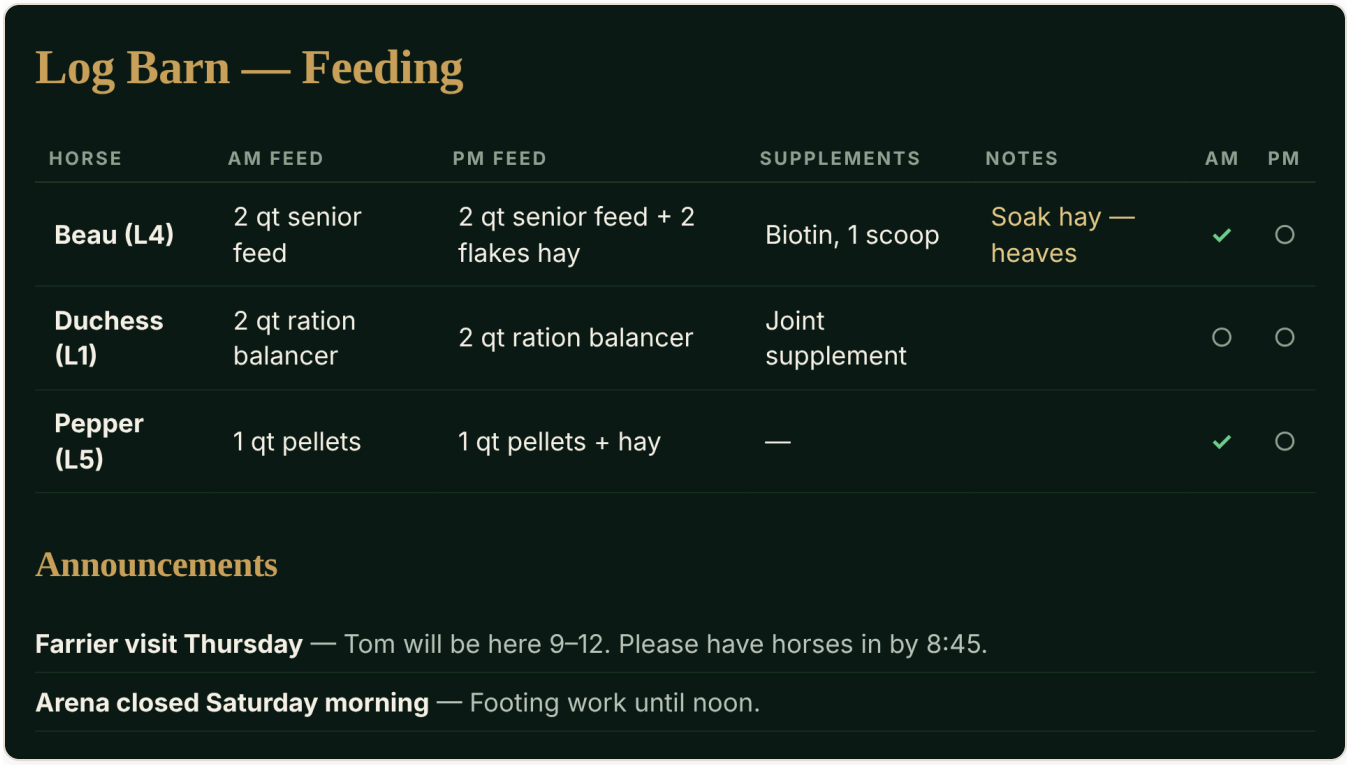

- **Add a user:** name, email, optional phone, a **role** (Employee, Boarder or Admin) and a temporary password (8+ characters). Tap **Create User**, then give them the password privately.
- **Change a role:** pick a new role in that person's row and tap **Set**.
- **Disable / Enable:** a disabled account can't sign in, but its history is kept. Use this when someone leaves.
- **Reset a password:** type a new temporary password in the row and tap **Reset**. The box shows what you type, so make sure nobody is watching.

> *i* You can't change your own role, disable yourself or reset your own password from this list; your row shows **(you)**. Use **My account** to change your own password. Keep at least two admins, so one can always help the other.

CHAPTER 5

Barn TV displays

Live feeding boards for each barn: no sign-in needed.

The Log Barn display on a TV

Addresses

Barn	Address
Log Barn	`buckshavenfarm.com/portal/barn-display/log-barn`
Arena Barn	`buckshavenfarm.com/portal/barn-display/arena-barn`

Each display shows that barn's active horses (stall in brackets) with AM feed, PM feed, supplements and special notes, plus a ✓ or ○ for whether each feeding is done today. Below that are the latest three **Everyone** announcements.

- The page **refreshes itself every minute**, so ticks from staff phones appear on their own.
- It **scales itself to fit** any screen, landscape or portrait, without scrolling. With more than 14 horses it switches to two side-by-side tables.

- A horse appears only if it's **active** and its **barn** is set to that barn.

Setting up a TV

1. Use any TV with a web browser, or connect a small computer or streaming stick that has a browser.
2. Open the barn's address above and bookmark it.
3. Switch the browser to **full screen** (on most computers, press `F11`).
4. Turn off the TV's or computer's sleep and screensaver settings so the board stays on.

> *i* The displays are public pages, so anyone with the address can see them. They show feed programs and announcements only, never names of owners, phone numbers or documents.

CHAPTER 6

The public website

How the website connects to the portal.

Portal button

The **Portal** button in the top menu of **buckshavenfarm.com**, and the *Boarder & Staff Portal* link in the footer, both open the portal's sign-in page.

Tour requests

The **Book a Tour** form at the bottom of the website emails each request to the farm inbox (currently **james@northvaleunified.com**). The email includes the visitor's name, email, phone, interest and message. Reply to it directly: replies go to the visitor.

The form is protected against spam robots. Real visitors notice nothing, but automated junk is quietly dropped, and each visitor can send only a few requests, so a flood of fake requests can't fill the inbox. Visitors do not get an automatic reply; please respond personally.

> ✓ To change which inbox receives tour requests, ask whoever maintains the website. It's a one-line change.

Gallery photos

The website gallery updates itself from a folder on the server. To add photos:

1. In Plesk, open **Files** (File Manager) for buckshavenfarm.com.
2. Go to `httpdocs/portal/httpdocs/assets/img/gallery`.
3. Upload JPG, PNG or WebP photos. They appear on the website within about 5 minutes.

Photos show in alphabetical order, so start the file names with numbers to control the order: `01-arena.jpg`, `02-trails.jpg`… To remove a photo, delete it from the folder. Uploaded photos survive website updates.

CHAPTER 7

Questions & troubleshooting

Quick answers to common questions.

"Wrong email or password" but I'm sure it's right

Check for a space before or after the email, and that Caps Lock is off. If it still fails, your account may be disabled, or your password was reset. Ask the office for a new temporary password.

I forgot my password

Ask the office. An admin sets a new temporary one under **Users** (or, for boarders, on the boarder's page). Change it under **My account** once you're in.

The change-password form says "Too many wrong attempts"

After 5 wrong current passwords, the form pauses for 15 minutes. Wait, then try again. If you've genuinely forgotten your password, ask the office to reset it.

The feeding checklist reset in the evening

The portal starts a new feeding day at **8:00 pm Eastern** (**7:00 pm** in winter), because it counts days in UTC time. PM feeds ticked after that time are counted toward the next day. Tick PM feeds before 8 pm (7 pm in winter), or ask the website maintainer to switch the portal to Eastern time.

A horse is missing from the checklist or a barn TV

On the horse's page, check that **Active on the farm** is ticked and the **Barn** is set. The barn TV only shows horses assigned to that barn.

A boarder can't see their horse

Link them as an owner on the horse's page (**Owners → Link a boarder…**). Make sure their account is active.

A staff member can't see a task

Staff see tasks assigned to them and tasks for **Anyone**. A task assigned to someone else won't appear for them.

The barn TV isn't updating

It refreshes every minute. If it seems stuck, reload the page (or switch the TV off and on), and check the barn's internet connection.

The portal shows "500 Internal Server Error"

The server needs attention. Note the time and the page you were on, and contact whoever maintains the website. The barn TVs and portal come back on their own once it's fixed; nothing you entered earlier is lost.

Good habits

- Change the temporary password you're given when you first sign in.
- Never share your login. Ask the office to create an account for anyone who needs one.
- Sign out on shared computers.
- Office: disable accounts for people who leave, and keep at least two admins.
